

## **Green Policy for Govt. Hrangbana College**

### **Introduction:**

In Govt. Hrangbana College we recognize our responsibility to minimize our environmental impact and contribute to a sustainable future. This Green Policy outlines our commitment to adopting eco-friendly practices across all aspects of our institution's operations.

### **1. Energy Conservation:**

- Implement energy-efficient lighting systems throughout the institution.
- Regularly assess and upgrade insulation and weather sealing in all buildings.
- Encourage staff and students to turn off lights, electronics, and appliances when not in use.
- Explore renewable energy sources like solar panels for powering our facilities.

### **2. Waste Management:**

- Implement a comprehensive recycling program for paper, plastic, glass, and other recyclable materials.
- Minimize single-use plastics by promoting reusable alternatives and providing water-refill stations.
- Implement composting initiatives for organic waste generated within the institution's premises.

### **3. Water Preservation**

- Install water-efficient fixtures, faucets, and toilets to reduce water consumption.
- Encourage water-saving practices among students and staff, such as reporting leaks promptly.
- Incorporate drought-resistant landscaping and rainwater harvesting systems.

### **4. Sustainable Transportation:**

- Promote cycling and walking by providing secure bike storage facilities and pedestrian-friendly pathways.
- Offer incentives for carpooling and the use of public transportation among staff and students.
- Install electric vehicle charging stations to encourage the use of electric vehicles.

### **5. Procurement and Consumption:**

- Prioritize the purchase of products with eco-friendly certifications and labels.
- Minimize paper usage by adopting digital documentation and communication systems.
- Source locally-produced goods and services to reduce transportation-related emissions.

## **6. Education and Awareness:**

- Integrate environmental education into the institution's curriculum and training programs.
- Organize workshops, seminars, and events to raise awareness about sustainability and green practices.
- Provide resources and information to empower staff and students to adopt sustainable habits.

## **7. Biodiversity and Green Spaces:**

- Create and maintain green spaces on campus to enhance biodiversity and provide a peaceful environment.
- Plant native trees and plants to support local ecosystems and improve air quality.
- Avoid the use of harmful pesticides and chemicals that can negatively impact the environment.

## **8. Monitoring and Reporting:**

- Regularly monitor and assess the institution's environmental performance and progress towards green goals.
- Set up a reporting mechanism to transparently communicate achievements, challenges, and future plans to stakeholders.

## **9. Continuous Improvement:**

- Establish a Green Committee responsible for overseeing the implementation of the Green Policy.
- Regularly review and update the policy to incorporate new technologies and best practices.
- Solicit feedback from staff, students, and other stakeholders to ensure continuous improvement.
- By adopting this comprehensive Green Policy, [Institution Name] is dedicated to reducing its environmental footprint and inspiring positive change within our community. Together, we can contribute to a more sustainable and greener future for all.
